	<b>Sisterna A10E-C</b>	<b>Sucrose Tetrastearate Triacetate</b>	<b>10.00</b>	<b>Sisterna</b>
	Vercare ANTIOX 70	Tocopherol, Helianthus Annuus (Sunflower) Seed Oil	0.10	Jover Scientech
	Cutibiome CLR	Octyldodecanol, Leptospermum Scoparium Branch/Leaf Oil, Piper Nigrum (Pepper) Seed Extract, Magnolia Officinalis Bark Extract	3.00	CLR

### Production method

1. Mix the ingredients at 80°C in the listed order.
2. Heat until completely transparent and homogeneous.
3. Pour directly into a suitable packaging while molten.
4. Cool down slowly to room temperature. Final viscosity will be built up after 48h.
